

# Closing Remarks

## TGSW 2018 Session 8-9

F. Ukegawa 2018/9/21

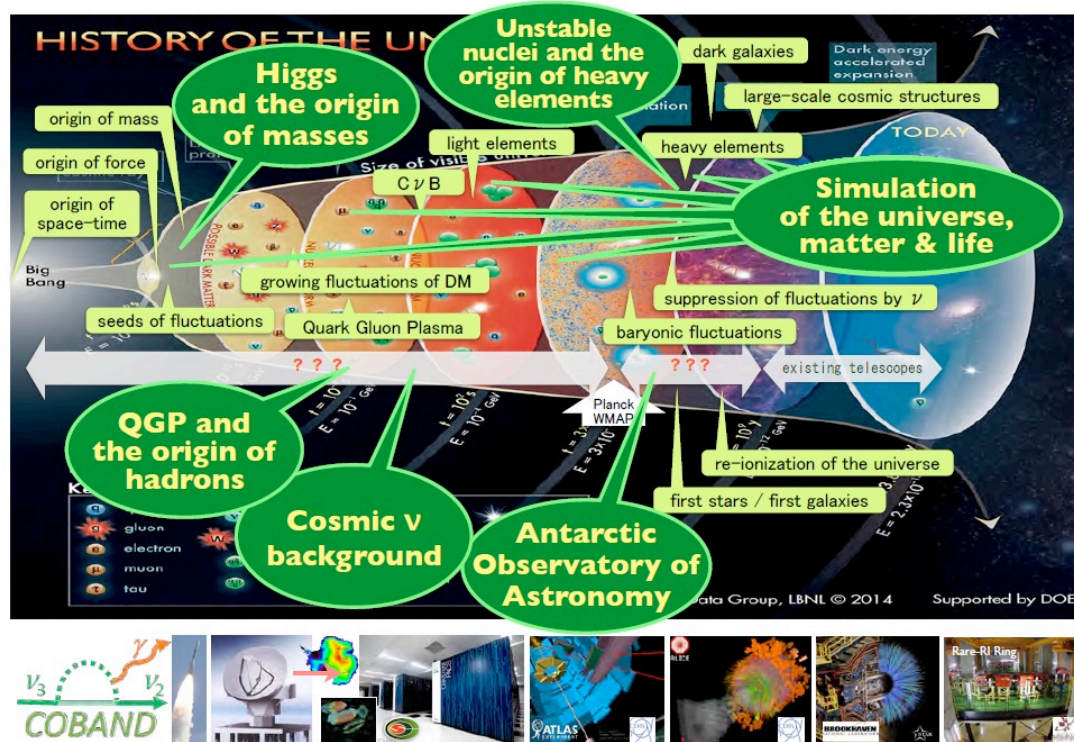

筑波大学  
*University of Tsukuba*

**Thank you  
to  
the Speakers for excellent talks,  
the Audience for discussions,  
the organizers/secretaries, ...**

In particular those who have travelled  
long hours/distances to reach here.

# Toward the unified view of the History of the Universe

- ❑ We are making excellent progress in all areas, from theory to computational to experimental/observational.
- ❑ Collaborations are truly international.
- ❑ Cosmology/particle/nuclear/astrophysics all part of one history, the History of the Universe → unified view  
At least experimental techniques are becoming borderless.
- ❑ Someday we will be speaking the same language.
